WHEN TO SEEK URGENT CARE:

Patients and caregivers are advised to contact the Medical Oncology Department or the treating consultant immediately or while on chemotherapy, targeted therapy, or immunotherapy, urgent medical attention is needed if you experience:

- Fever above 38°C (100.4°F) – this can be a sign of serious infection.
- Bleeding or unusual bruising, blood in urine, stool, or vomiting blood.
- Severe nausea, vomiting, or diarrhea not controlled by medicines.
- Shortness of breath, chest pain, fainting, or palpitations.
- New or sudden weakness, confusion, seizures, or loss of bladder/bowel control.
- Allergic or infusion reaction – rash, itching, swelling of face/lips, breathing difficulty.
- Uncontrolled pain despite taking medicines.
